Exam Preparation and Free Resources

Name of the Student:_____
Max. Marks : 17 Marks **Time : 17 Minutes**

Q1.

A main sequence star in a distant galaxy is the same size and mass as the Sun.

(a) Explain why the star is stable while it is in the main sequence stage of its life cycle.

_____

_____

_____

_____

_____

(2)

(b) Describe what will happen to the star between the main sequence stage and the end of the star's life cycle.

You should include the names of the stages in the life cycle of the star.

_____

_____

_____

_____

_____

_____

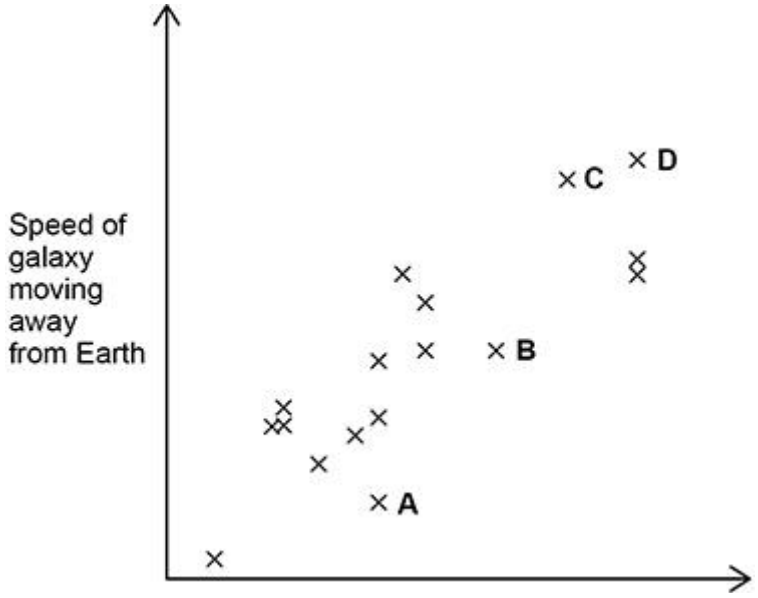

_____

_____

(3)

(c) The figure below shows how the speed of galaxies moving away from Earth varies with the distance of the galaxies from Earth.

Downloaded from www.merit-minds.com

Which galaxy would show the smallest observed change in the wavelength of visible light?

Give a reason for your answer.

Tick (✓) **one** box.

A ☐ **B** ☐ **C** ☐ **D** ☐

Reason _____

_____

(2)

(Total 7 marks)

Q2.

(a) The light from distant galaxies shows red-shift.

Complete the sentence.

The term red-shift describes the observed increase

in the _____ of the light from a distant galaxy.

(1)

(b) The Big Bang theory is one model used to explain the origin of the universe.

How does the Big Bang theory describe the universe when it began?

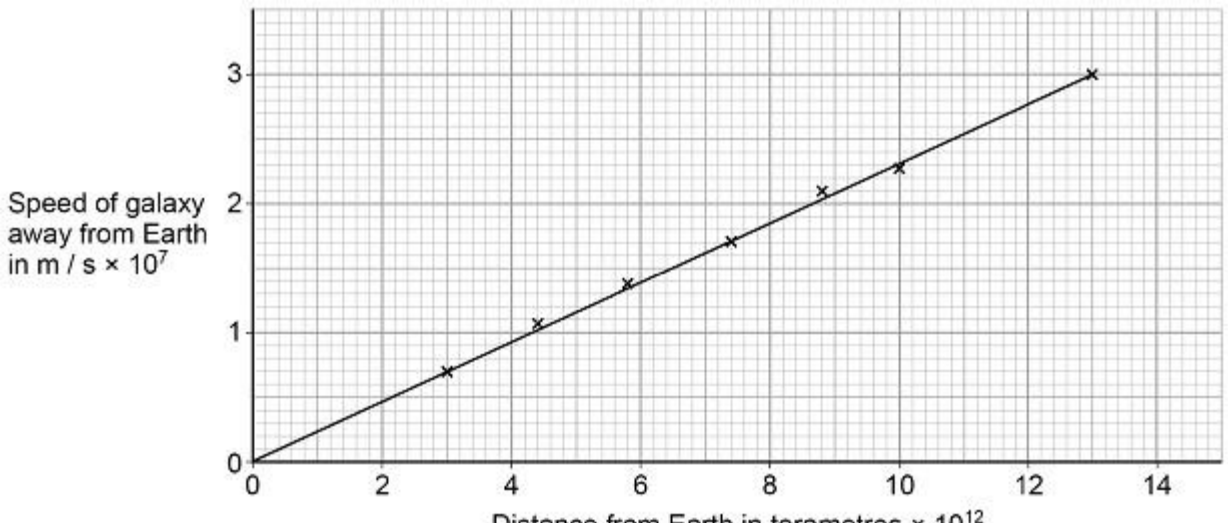

_____

_____

(1)

The figure below shows data scientists have calculated from measurements of red-shift.

Downloaded from www.merit-minds.com

(c) Describe the relationship between the speed of a galaxy and the distance the galaxy is from the Earth.

_____

_____

(1)

(d) Which of the following is the same as 6×10^{12} terametres?

Tick (✓) **one** box.

6×10^{15} m ☐

6×10^{18} m ☐

6×10^{21} m ☐

6×10^{24} m ☐

(1)

(e) Explain how the data in the figure above supports the suggestion that the universe began from a very small region.

_____

_____

_____

_____

_____

(2)

(f) The Big Bang theory suggested that gravity would slow the rate at which galaxies move away from the Earth.

Downloaded from www.merit-minds.com

New observations suggest that distant galaxies are moving away from the Earth at an increasingly fast rate.

What do the new observations suggest is happening to the universe?

_____

_____

(1)

(g) New observations and data that do not fit existing theories should undergo peer review.

Give **one** reason why peer review is an important process.

_____

_____

_____

(1)

(h) The Andromeda galaxy is moving towards the Earth.

Describe how the wavelength and frequency of the light from Andromeda seem to have changed when viewed from the Earth.

_____

_____

_____

_____

(2)

(Total 10 marks)
